Introducing The Office Cat

A Radio Renaissance?

The radio audience in Western Canada which has suffered expensively for some considerable time, and in recent months in inarticulate silence outside the home, has at last some reason to hope that some of the disabilities under which it has been suffering are about to be removed, or at least ameliorated.

The grounds for these hopes are based on the recent public utterances of Major W. E. Gladstone Murray, the imported general manager of the comparatively new set up, the Canadian Broadcasting Corporation, successor to the erstwhile Canadian Radio Commission, on the occasion of his first trip to the west since his appointment, which coincided with the re-organization of the radio governing body of the Dominion.

A year ago radio columns in the daily press were filled with lamentations and the gnashing of teeth of radio fans whose complaints of interference, inadequacy of programs and other causes of disastisfaction with the status quo swelled into a diapason of discontent.

To the average Western Canadian owner of a receiving set it appeared that very little heed was being pald to his complaints and little or nothing being done to remedy them and that the only reply to his expressions of annoyance was to double his contribution to the commission for the privilege of listening in to what he did not want to hear.

abilities.
"They forgot I can knit," she said.
She produced her decks of cards
to show how she plays bridge. Each
card is stamped top and bottom with
Braille characters to indicate its
value. Even after the stamping has
worn nearly amooth she finds no
difficulty in telling what is in her
hand.

of listening in to what he did not want to hear

Since that time the chorus of disapproval seems to have diminished somewhat but this must not be construed in official quarters that discontent somewhat but this must not be construed in official quarters that discontent has disappeared. It would be more correct to diagnose it as a demonstration of tolerance on the part of the Western radio public—a desire to give he new governing body an opportunity to study defects and disabilities in the hope that they will be able to remedy them and give the radio fans something more to their taste.

As intimated at the outset there is some reason to hope, in the light of Major Murray's statements that something is going to be done, and in the near future, to give Western Canadians a better break in the radio field than they have had hitherto.

It is true that Major Murray's public comments were entirely devoid of

the near riture, to give Western Canadians a better break in the reado hear than they have had hitherto.

It is true that Major Murray's public comments were entirely devoid of any information as to what steps will be taken precisely to remedy long-standing complaints but the general tenor of his published remarks indicated that he is fully aware of the causes of discontent on the prairies and an intimation that something is going to be done in an effort to more nearly meet the wishes of the licensees in this section of the Dominion was coupled with the interviewa he gave the press.

The mere fact that recognition is given to the existence of complaints is half the battle and engenders a reasonable hope that solutions of some of the major problems are to be found within a reasonable time.

The following extract from one of his interviews shows that Major Murray hap the his finger on some of the chief causes of annoyance to Western Canadian Insteners to obtain their favorite United States programs through blankeling of the southern stations by Canadian ones. He hoped a new allotment of wave lengths would follow, with special benefit to Canada, from the world conference on wave lengths to be held in Cairo in 1938. That conference likely would be preceded by regional conferences.

"Despite the existing wave length agreement between Canada and the United States, no agreement existed with Mexico and considerable difficulty was noted from that quarter. The C.B.C. manager also expressed his awareness of the difficulty of local listeners obtaining their favorite Canadian programs because of local programs by stations in their area.

"Major Murray said the average radio listener wanted variety with a fair measure of better class music.

"He announced the intention of the C.B.C. to take part in a scheme of exchanging producers within the Empire and with the United States. He mentioned particularly proposed exchanges between the C.B.C., B.B.C., and K.B.C. It was wish, she felt, for Canadian programs producers to widen the It is true that Major Murray's public comments were entirely devoid of

"We must put trained investigators to work to find other uses for our products in danger of being displaced, and we must find new products which can be made from available raw materials in order that stability of employment and of capital investment may be maintained, and particularly that the appalling waste and misery which comes in the trail of any decadent industry may be avoided."

was being done elsewhere."

While the points mentioned by Major Murray do not by any means cover the entire ground, the very fact that he is quickly assimilating the causes of difficulties and objections in the west, is to say the least encouraging and his attitude indicates that he is anxious and willing to meet the wishes of the western audience, insofar as it may be feasible. Officers Of Anti-Aircraft Brigade
Testing Remarkable Machine
Officers of an anti-aircraft brigade
at Manchester, England, are testing
a remarkable machine which gives
warnings of air invaders. The 'predicter' operated electrically, records
the speed of approaching airplanes,
their height, and the speed and direction of the wind. The information
passes by electrical cable to the antiaircraft guns.

Has Acres Of Nuts

ties On IIIs Farm
Michigan can grow any type of
nut that is produced anywhere in
the United States, Europe or Asia,
according to George Hebden Corson
of Islington, Toronto suburb, who
was in Detroit with 300 varieties to
be shown the Boy Scouts. Corson,
77, has 20 acres of nuts on his
Islington farm and more than 300
writeties. They wraper from Eurlish
writeties. They wraper from Eurlish isington farm and more than 300 varieties. They range from English walnuts to paper shell pecans and from chestunts to a hybrid of pecan and old-fashioned hickory nut.

"Nuts always hring good prices," Corsan said. Years ago, Corsan was swimming instructor at University of Toronto.

In the profane lexicon of the in considerate driver, there's no such verbiage as "Pardon me."

Heavy Plane Purchases

World Will Spend Nearly A Billion
Dollars For Aircraft This Year
The world will spend nearly \$1,000,000,000 for aircraft this year, a
research expert of the acronautics
industry said—and four of every
five of the 28,500 units to be produced will be fighting planess.
Howard S. Welch, vice-president
and general menager of the Bendix
Aviation Export Corporation, estimated all nations would spend a
total of \$311,000,000 for new planes,
equipment, and spare parts in 1937. Introducing The Office Cat
A notice on the bulletin board from
William Allen White introduced
Copy, a black tom-cat, to the staff
of the Emporia, Kansas, Gazette.
"Mice are overrunning the basement.
I have, therefore, decided to add to
our already extensive equipment one
double-evilnet; T-model, repossessed. our aready extensive equipment one double-cylinder, T-model, repossessed cat. Be good to the cat! Don't let him feed in the melting-pot and don't throw slugs at him for walking on the keyboards of the linotypes, The girls in the front office will feed him."

Hitler's Decision About Nobel Prizes
Sweeps Away Good Pecling
Chancellor Adolf Hitler's decision
forbidding Germans to accept Nobel
prizes in the future created a more
unfavorable impression in Sweden
than anything that has happened in
Germany since the "purge" of June,
1934. By a stroke of the pen Hitler
has swept away most of the good-will
toward Germany built up by Dr.
Joseph Goobbels' propaganda department in the hast few years.

The official German explanation is
scorned and it is said that the mere
fact that the Nazi government has
taken this decision shows that it
realizes that the prizes still constitute an important link between Germany and the outside world.
Even during the World War the
work of the Swedish Nobel Committiee, which awards the prizes for
physics, chemistry, medicine and
Swedes remember with pride that

- But, oh, how she needed Michaels' am sailing for Hawaii with Lance arms to give her courage!

The next morning's mail brought another of the anonymous notes. This time Michael turned it over to his time described in the second of the seco

strength.

In that moment she saw her purpose plain before her, no longer nebutous. At last the time had come for that so-long-delayed idea that she must step out of the pleture. She knew that she must see the thing through alone. Michael must never know of this thing—any of it. She had to go away. She would still fight—of course she would fight!—but if she lost, Michael must not know. If her battle proved successful, then maybe some day she and Michael might be able to start all over again, with all misunderstandings wiped out, with perfect peace between them, and no shadows to mar their happiness.

But where in the world could she go that he would not find her? Michael's forgiving nature—always blaming himself for everything—As soon as he found her gone, he would at once begin feverishly to search her out. No, she must fix hings somehow so that he would not want to find her!

An item in the morning paper

find her!

An item in the morning paper which she read as she nibbled at her solitary breakfast—Michael had already gone out—supplied her with an idea. The headline read:

to make a sacrifice like this, for Mi-

chae's sake. •
Somehow she managed to get into her cichnes, and packed a bag. It was Sapphira's day off and she was alone. That was well. She felt as if she were incapable of ever again making any lying excuses, in words. She sat down at her desk and scribbed a hasty note. Michael would never know that she had written it with her heart's blood. It was a

One of the major difficulties this season will be condition of animals, one buyer stated Owing to blocked roads and short feed supplies there are virtually no fat farm horses in the south while for the first time in some years deaths have been reported among

other animals,

Ordinarily, it is pointed out,
the horses winter with bnt few losses.

lumber camps and bash coun-

Owing to lack of snow in the east the demand is solely for good farm chunks so far while the larger animals listed for sale have not been as readily sold.

Owing to difficulties faced by farmers in getting in from their country homes and similar trouble with agents mov-ing very far afield the purebred sales have been quiet in recent

Find Pair of Pliers In Horse's Stomache

BROOKS, Feb o (Special Dispatch) - A pair of pliers lost for more than two years was found recently in a horse's

In October, 1934, a horse owned by Harry Ankrum, of Resemery, needed some denal work done J. D. Wheeler, of Patricia, acting as dentist when the pliers he was using slipped from his hand and were swallowed by the horse The animal seemed to suffer no discomfort, and worked his customary hours and was it good condition until his death

when the horse was exam ined to determine the cause of its death, the pliers were found in the pit of its stomach

Farmers, Interest In Transport Rates Is Held Paramount

Line Elevators Tell Government Limiting Lake Freight Competition is disadvantageous to Farmers

Winnipeg - Appeal to the Duninion Government to consider the interests of the farmer as para-mount in Legislation relating to grain transportation rates before Parliament was made in a telegram forwarded to the Hon. C. D. Howe, minister of transport, by the North West Grain Dealers' Association.

The message dispatchetd to the Government by the Line Elevator Companies who comprise the membership of the North-West Grain Dealers' Association, reads:

With reference to proposed Act to establish a Board of Fransport Commissioners for Canada the Country Elevator Companies who are members of this Association and whose customers comprise more than 50 per cent of western farmers respectfully draw Government's attention to danger that the fixing of uniform rates for steamship companies upon Great Lakes will tend to limit competition presently, benificial to cost of movement of Canadian Grain and particularly to pessibility of additional builden upon Western farmers due to increased freight charges STOP Earnestly recommend that interest of hard pressed Western farmer be considered paramount in any legislation or regulations directly or inderectly affecting grain transportation

Mr. J, H. Cooley left on uesday for Calgary where ne will spend a few days.

Mrs N. D. Stewart is a algary visitor this week.

The Ladies' Card Club met Tuesday evening with Mrs. P. Petersen as hostess, the honors were shared by Mrs. Todd and Mrs R binsen. The next meeting will be held at the h me of Mrs. Youell,
